

SUMPRO[®]

THE LEADER IN FLOOD CONTROL TECHNOLOGY

The Ultimate Fully-Automatic 115V
Auxiliary Power Source
For Residential
Flood Control

Patent No. 5,508,905

- ⚡ Easy Installation, no modifications or piping changes
- ⚡ Works with any 115V sump pump up to 1/2 H.P.
- ⚡ Powers your existing sump pump in an outage
- ⚡ Microprocessor based system design
- ⚡ Fully automatic charging system
- ⚡ Made in the U.S.A.

Quality Construction Features

A battery back-up that won't leave you in the dark!

SUMPRO is the ultimate, fully-automatic, auxiliary power source that money can buy. SUMPRO is a power converter which allows you to do what you have never been able to do before. The SUMPRO actually takes D.C. battery power and converts it into 115 VAC power (when standard power fails or is not available). This allows you to eliminate those unreliable 12 VDC powered pumps and continue to use your standard 115 VAC pump without any modifications or piping changes.

Power+ Battery

For optimal performance, install Metropolitan Industries' maintenance-free AGM **Power+** batteries (not included).

NOTE: By adding extra batteries, you can double or triple the run time!

Performance data based on two 120 Amp hour U.L. Recognized Lead Acid Type batteries used in conjunction with pumps of the published horsepower ratings. All equipment in optimum condition. Endurance may vary depending on the products used.

SUMPRO[®]

Installs in minutes - plug SUMPRO into wall outlet - plug sump pump into SUMPRO - that's all there is to it...

Typical Flood Control Installation
